Bibliography

CEN/TS 17981-1, *In vitro diagnostic Next Generation Sequencing (NGS) workflows — Part 1: Human DNA examination*

EN ISO 14155, *Clinical investigation of medical devices for human subjects — Good clinical practice (ISO 14155)*

EN ISO/IEC 17043:2010, *Conformity assessment — General requirements for proficiency testing (ISO/IEC 17043:2010)*

EN ISO 17511:2021, *In vitro diagnostic medical devices — Requirements for establishing metrological traceability of values assigned to calibrators, trueness control materials and human samples (ISO 17511:2020)*

EN ISO 20166-2:2018, *Molecular in vitro diagnostic examinations — Specifications for pre-examinations processes for formalin-fixed and paraffin-embedded (FFPE) tissue — Part 2: Isolated proteins (ISO 20166-2:2018)*

EN ISO 20166-3:2019, *Molecular in vitro diagnostic examinations — Specifications for pre-examination processes for formalin-fixed and paraffin-embedded (FFPE) tissue — Part 3: Isolated DNA (ISO 20166-3:2018)*

EN ISO 20166-4:2021, *Molecular in vitro diagnostic examinations — Specifications for pre-examination processes for formalin-fixed and paraffin-embedded (FFPE) tissue — Part 4: In situ detection techniques (ISO 20166-4:2021)*

EN ISO 20184-3:2021, *Molecular in vitro diagnostic examinations — Specifications for pre-examination processes for frozen tissue — Part 3: Isolated DNA (ISO 20184-3:2021)*

EN ISO 20186-2:2019, *Molecular in vitro diagnostic examinations — Specifications for pre-examination processes for venous whole blood — Part 2: Isolated genomic DNA (ISO 20186-2:2019)*

EN ISO 20186-3:2019, *Molecular in-vitro diagnostic examinations — Specifications for pre-examination processes for venous whole blood — Part 3: Isolated circulating cell free DNA from plasma (ISO 20186-3:2019)*

EN ISO 22174:2005, *Microbiology of food and animal feeding stuffs — Polymerase chain reaction (PCR) for the detection of food-borne pathogens — General requirements and definitions (ISO 22174:2005)*

ISO 5725-1:2023, *Accuracy (trueness and precision) of measurement methods and results — Part 1: General principles and definitions*

ISO 5725-2:2019, *Accuracy (trueness and precision) of measurement methods and results — Part 2: Basic method for the determination of repeatability and reproducibility of a standard measurement method*

ISO 9000:2015, *Quality management systems — Fundamentals and vocabulary*

ISO 13495:2013, *Foodstuffs — Principles of selection and criteria of validation for varietal identification methods using specific nucleic acid*

ISO 14621-1:2019, *Space systems — Electrical, electronic and electromechanical (EEE) parts — Part 1: Parts management*

ISO 15190, *Medical laboratories — Requirements for safety*

ISO 15193:2009, *In vitro diagnostic medical devices — Measurement of quantities in samples of biological origin — Requirements for content and presentation of reference measurement procedures*

ISO 15194:2009, *In vitro diagnostic medical devices — Measurement of quantities in samples of biological origin — Requirements for certified reference materials and the content of supporting documentation*

ISO 17123-1:2014, *Optics and optical instruments — Field procedures for testing geodetic and surveying instruments — Part 1: Theory*

ISO 17966:2016, *Assistive products for personal hygiene that support users — Requirements and test methods*

EN ISO 18113-1:2009, *In vitro diagnostic medical devices — Information supplied by the manufacturer (labelling) — Part 1: Terms, definitions and general requirements (ISO 18113-1:2009)*

ISO 20387, *Biotechnology — Biobanking — General requirements for biobanking*

ISO 20395:2019, *Biotechnology — Requirements for evaluating the performance of quantification methods for nucleic acid target sequences. qPCR and dPCR*

ISO/TS 20658, *Medical laboratories — Requirements for collection, transport, receipt, and handling of samples*

ISO/TS 22692, *Genomics Informatics — Quality control metrics for DNA sequencing*

ISO/TS 22693:2021, *Genomics informatics — Structured clinical gene fusion report in electronic health records*

ISO 22949-1:2021, *Molecular biomarker analysis — Methods of analysis for the detection and identification of animal species in food and feed products (nucleotide sequencing-based methods) — Part 1: General requirements*

ISO 35001, *Biorisk management for laboratories and other related organisations*

ISO Guide 30:2015, *Reference materials — Selected terms and definitions*

ISO/IEC Guide 99:2007, *International vocabulary of metrology — Basic and general concepts and associated terms (VIM)*

EN ISO 13485, *Medical devices — Quality management systems — Requirements for regulatory purposes (ISO 13485)*
