

Open Call for Tender

for data evaluation for the determination of volatile organic compounds that are precursor substances in ambient air support of Directive 2008/50/EC

Starting date: 2025-09-09

Deadline for tenders: 202-10-15

I Introduction

I.1 General

The following projects require the development and validation of standardized measurement methods for ozone precursors using the following techniques:

- Automatic pumped sampling, pre-concentration and on-line gas chromatography with flame ionisation detector (FID) and/or mass spectrometer detector (MSD);
- Manual or automatic canister sampling followed by off-line gas chromatography with FID and/or MSD;
- Manual or automatic pumped sampling followed by off-line thermal desorption and gas chromatography with FID and/or MSD;
- Diffusive sampling followed by thermal desorption by off-line gas chromatography with FID and/or MSD;
- Manual or automatic pumped sampling of formaldehyde on dinitrophenylhydrazine (DNPH) followed by off-line high-performance liquid chromatography (HPLC) / ultraviolet (UV) detection;
- Diffusive sampling of formaldehyde on DNPH followed by off-line HPLC/UV detection.

For these projects, the data evaluation will be contracted. These tasks (WP 7 see Section II) are subject to this call for tender.

I.2 Context

A standardization request in support of Directive 2008/50/EC on ambient air quality and cleaner air for Europe (= the Directive) has been issued. The Commission requests the European Standardisation Organisations (ESOs) to develop validated standard measurement methods for the measurement and monitoring of volatile organic ozone precursors in ambient air in order to ensure a harmonized implementation of the Directive. The Commission has requested a programme for Standard development. WG 13 has considered how best to fulfil the requirements of this standardization request, and proposes that the most appropriate way to deliver the requested standards is as follows most likely as a single standard containing multiple parts:

1. Automatic pumped sampling, pre-concentration and on-line analysis by thermal desorption gas chromatography (TD/GC) with TD/GC with FID and/or MS of ozone precursors except formaldehyde
2. Manual or automatic pumped sampling of ozone precursors except formaldehyde followed by offline GC with FID and/or MS
3. Manual or automatic canister sampling of ozone precursors except formaldehyde followed by offline GC with FID and/or MS
4. Diffusive sampling of ozone precursors except formaldehyde followed by offline TD/GC with FID and/or MS
5. Manual or automatic pumped sampling of formaldehyde on DNPH followed by offline HPLC/UV

6. Diffusive sampling of formaldehyde on DNPH followed by offline HPLC/UV

The European Committee for Standardization (CEN) is a business facilitator in Europe, removing trade barriers for European industry and consumers. Its mission is to foster the European economy in global trading, the welfare of European citizens and the environment. Through its services it provides a platform for the development of European Standards and other technical specifications. CEN's National Members are the National Standardization Bodies (NSBs) of the 27 European Union countries, United Kingdom, the Republic of North Macedonia, Serbia and Turkey plus three countries of the European Free Trade Association (Iceland, Norway and Switzerland). There is one member per country.

The standardization request in support of Directive 2008/50/EC on ambient air quality and cleaner air for Europe was notified to CEN with EC implementing decision in June 2019. The CEN Technical Board (BT) allocated the execution of the work to CEN/TC 264 "Air Quality". In TC 264 the standardisation and validation work are performed in WG 13 "Ambient air – Ozone precursors and benzene". DIN, the national standards body for Germany, provides the secretariat of CEN/TC 264/WG 13 and will perform the administrative management of the standardization work.

Standardized methods of analysis are of utmost importance for guaranteeing a uniform application of European legislation in all Member States.

II Objectives

The standardization request requires the drafting of six European standards. All six standards, which are subject of the standardization request, require the development and validation of measurement methods. The whole validation test programme consists of the following work packages:

Work Package 1: Consultant for planning, coordination and conceptual design for all requested methods

The task of the consultant is to ensure (in cooperation with the secretariat) a harmonised preparation of the standards. The consultant is (in cooperation with the secretariat) responsible for the preparation of the specifications which serve as the basis for the call for tender procedures for the validation tests (WP 3, 4, 5 and 6). This will involve identifying and reviewing any and all existing EN and/or ISO standards and other available measurement guidelines that are concerned with the measurement of volatile organic compounds in ambient air.

Work package 2: Literature survey and consultation

WP 2 consists of a literature survey and consultation with users and manufacturers providing administrative, scientific and technical information as the basis for the successful standardization of the six methods listed in I.2. The execution of WP 2 requires cooperation with the owner of WP 1. The results of WP 2 affect the design of WPs 3 to 8.

Work Package 3: Evaluation of parameters associated with analytical instrumentation

WP3 consists of a series of tests to evaluate the practical limits (e.g. applicable ambient air concentration range) associated with the analytical instrumentation required for the requested analytical methods (GC-FID and GC-MS for ozone precursors and HPLC for formaldehyde) and is inseparable from the equivalent tests of the samplers. Work packages 3 and 4 shall therefore be carried out together by the same laboratory(s). If this is not possible, the laboratories responsible for WP 3 and WP 4, have to show a way cooperation and coordination of the measurement tasks and sharing of the data. The tests will determine the most critical performance characteristics of the analytical methods and will both validate aspects of the technical specifications (as developed in WP1) and help define the conditions required for laboratory and field trials (Work packages 5 and 6). They will include, the limit of detection, blank levels (analytical interferences, including carry-over) calibration technique and measurement repeatability, with particular emphasis on monitoring the lowest levels of interest and under a range of likely environmental conditions. The evaluation tests should cover the entire volatility range of organic ozone precursors listed in Directive 2008/50/EC and take into consideration their abundance in ambient air.

Work package 4: Evaluation of specific parameters associated with the sampling method

WP4 consists of tests to evaluate the practical limits and performance characteristics of the requested sampling methods and is inseparable from the equivalent tests on analytical instrumentation. Work packages 3 and 4 shall therefore be carried out together by the same laboratory(s). WP4 tests will vary across the different sampling methods and will both validate aspects of the technical specifications (as developed in WP1) and help define the conditions required for laboratory and field trials (Work packages

5 and 6). The tests will include, for example, blank levels (artefacts and carry-over) under different storage conditions (times, temperatures, etc.) and the impact of environmental conditions (ambient temperature, humidity, etc.) on sampling efficiency and measurement repeatability, with particular emphasis on monitoring at the lowest levels of interest (see Table 1). The evaluation tests should cover the entire volatility range of organic ozone precursors listed in Directive 2008/50/EC taking into consideration their abundance in ambient air. This will allow the volatility range limits of each individual sampling approach to be defined.

Work package 5: Testing under laboratory conditions

WP5 consists of a series of validation tests to evaluate each sampling method under controlled laboratory conditions. The efficiency of collection of ozone precursors and formaldehyde onto any sorbent, diffusion tube or canister, will be influenced by the prevailing amount fraction known environmental interferences in the sampled air. These studies will quantify the effects and also assess the effectiveness and practicalities of known mitigation methods. The results will be used in the uncertainty budgets for final results and for define best practice in the case of mitigation approaches. The test programme will need to be assessed for each of the requested sampling methods to assess the effects. Tests will be performed at a range of ozone and water vapour concentrations, either by dynamic dilution or by sequential gas injection onto the sorbent trap or into a sampling canister.

Work package 6: Testing under field conditions

WP6 consists of a series of validation tests to evaluate each sampling method under field conditions and will serve to show reproducibility under field conditions and to compare results from different methods in field conditions. The field tests will be undertaken by a number of accredited test laboratories. The results of the field tests will be discussed within WG13 and based on the outcome the technical specifications will be finalized.

Work package 7: Data evaluation

The Data Coordinator (DC) will collate all the data from all the validation tests (WP3 to WP6) and will perform the data evaluation tests with support from the expert laboratories that conducted the validation tests. For each method, the results of all the test programmes will be reviewed and recommendations made to modify, if necessary, the text of the technical specifications to produce the standard method text. Individual test components will be assessed for their contribution to the total uncertainty budget and clear instruction for how to undertake the tests will be provided.

Work package 8: Project coordination

The Project Coordinator (PC) or coordinators, in the case of a consortium bid, will ensure a harmonized performance of all validation tests. This involves the following tasks:

- Coordination of overall validation programme and liaison between WG13 and successful validation work contractors (WP3, 4, 5, 6 and 7)
- Review reports for WP 3, 4, 5, 6 and 7 to ensure compliance with the requirements of technical specifications developed by WG13
- Develop and provide reporting templates to ensure harmonised reporting across all technical WP's
- Timely preparation of a summary of the final test validation results
- Attending meetings scheduled by WG13

III Execution

III.1 Tasks of work package 7

The execution of the standardization request will be divided into several work packages (see Section II). This call for tender refers only to WP 7.

VDI/DIN will carry out the procedural work and sign the contracts with the selected subcontractors following authorization by EC.

The successful contractor will be required to join WG 13 and will be expected to actively take part in the meetings and discussions of WG 13 and to contribute to the development of the standard.

The successful contractors for WP 7 will have to cooperate with the successful contractor of WP 8. This includes a detailed planning and coordination of the measurement tasks and sharing of the data.

Expected outcome of work package 7 (data evaluation)

WP 7 consists of a Data Coordinator who will collate all the data generated from all the validation tests (WP 3 - 6) and will perform an evaluation of that data with support from expert laboratories that conducted the validation tests.

The Data Coordinator will

- Become a member of CEN/TC 264/WG13 and actively participate in scheduled WG13 meetings
- Develop a data reporting template to harmonise the collection of data from the laboratory and field tests in collaboration with CEN TC 264 /WG 13 and the WP 3 – 6 contractors.
- Support the WP 3- 6 contractors with the test design and validation of the data collected during the tests, if necessary.
- Review the results for all test programs for each method;
- Propose a validated calculation method and implementation in an open access format for the uncertainty calculation of the six methods according to the Technical Specifications for approval by CEN TC 264 /WG 13.
- Use the approved implementation of the calculation method to evaluate the measurement uncertainty for the six methods;
- Provide recommendations with evidence for any necessary suggested modifications that WG13 shall make to the text of the Technical Specifications in order to produce the final European Standard Method text

Deliverable: Provide summary of all recommendations with evidence for all necessary modifications that WG13 shall make to the text of the Technical Specifications in order to produce the final European Standard Method text.

III.2 Timeframe

The service contract shall enter into force on the date on which it is signed by the last contracting party. The contract with the selected candidate will be signed following the approval of the selection by EC.

The execution of the tasks may not start before the contract has been signed.

The project shall be finalized within 18 months from the signing of the contract. Detailed time frames for the respective projects are given in the Annex 1.

The owner of WP7 shall respect the deadline of the deliverable.

IV Financial support

The European Commission and EFTA have decided to provide financial support to the measurement method validation and the standardization work. The financial support from the European Commission and EFTA is based on the SMP 'Single Market Programme Regulation' (including its Financing Decision) and the MGA (Multi or mono beneficiary(ies) Grant Agreement). Unless specified otherwise, costs of external subcontractors such as laboratories or Consultants are generally funded at 100%, with approx. 95% being borne by EC and 5% by EFTA. Costs have to qualify as eligible as defined in MGA ESOS/2021/3111/12525-AG and also in compliance with [EC Financial Regulation](#), and be justified. The payment is usually divided into several instalments after completion of defined milestones and approval of the interim/final reports and the justification of costs. The subcontractors shall fulfil the conditions of the MGA ESOS/2021/3111/12525-AG, including those relating to liability, ownership of results, confidentiality, conflict of interests, publicity, evaluation, assignment, checks and audits.

The service contract is given in the Annex 2.

The payment of the work is divided in three instalments:

- 50 % initial prefinancing
- 25 % after submission of the contractually agreed interim report including the details necessary for drafting the requested European Standard, (see III.1).
- 25 % after submission of the contractually agreed final report. Payment will be done after reception of the EU funds by DIN as final payment.

The subcontractors' costs shall be justified with copies of the relevant invoices. All relevant evidence shall be kept in view of future payments (reports, work, drafts and deliverables, contracts & invoices, time sheets, tickets, boarding cards, hotel invoices, attendance lists with signatures, meeting agendas & reports, invoices for any consumables, purchase orders, etc...).

Costs incurred before the Grant Agreement is signed (unless, exceptionally differently agreed with the EC) and before the selection procedure is finalized, will not be considered as eligible for EU financial support.

V Selection criteria

The applicants shall comply with the following requirements:

- at least five years of experience in performing ambient air measurements for national and/or international programs.
- Experience in data evaluation, statistical analysis and measurement uncertainty calculations.
- Active participation (reporting) in the (validation and standardization) work of CEN/TC 264/WG 13 which includes attendance of the WG 13 meetings or related national mirror groups.

VI Award criteria

The selection of contractors will be made on the basis of the following criteria (with weighting in percent):

- i. at least five years' experience in performing relevant measurement work, uncertainty budgets and statistical data evaluation (25 %);
- ii. experience with comparable projects on the development and validation of test methods (25 %);
- iii. demonstration of high quality of work (e.g. by a formal quality management system) (25 %);
- iv. ability to submit agreed deliverables at specified dates, by providing a template, proposing the calculation and using the approved calculation method to provide results in a written report (15 %).
- v. a representative of the contractor is a member of CEN/TC 264/WG 13 (10%).

Scores from 0 to 4 are possible. The evaluation of tenders is based on a scoring system ranging from 0 to 4, with points and percentage values. Each criteria of a tender is awarded points between 1 and 4, and these scores are then weighted and summed according to predetermined percentages.

Tenders scoring less than 70 % of the overall total points or less than 50 % (meaning less than 2 points) of the points awarded for a single criterion, will be excluded from the remaining assessment procedure.

The selection panel shall select the candidate with the highest score. In the case of two or more candidates of equal qualification, the tender providing the best value for money shall be taken into consideration by the selection panel.

VII Eligibility criteria

The following candidates will be excluded:

- Candidates who were the subject of a non-likely judgment of recourse for a professional infringement
- Candidates who are in an irregular tax situation or in an irregular special taxation situation
- Candidates who provide incomplete or erroneous information.
- Candidates who submit their application after the submission deadline.
- Candidates with any conflict of interest.

VIII Tenders

Tenders shall be sent to secretary of CEN/TC 264/WG 13, Ms Elisabeth Hösen-Seul, as soon as possible, to be received at the latest by 2025-10-15.

Tenderers shall place a bid inside a sealed envelope clearly marked CONFIDENTIAL, placing the sealed envelope in an envelope which is posted to the address indicated.

The tender shall be in English and contain:

- Curriculum Vitae of each relevant person participating in the project, demonstrating the necessary expertise for the 'Advertised position';
- Any required accreditation certificates;
- A schedule and a description of the execution of the tasks which will be carried out in the project as such;
- A table with detailed information on the costs, broken down by billable cost categories e.g. man-days, travel costs, shipment, sub-contracts etc. ;
- Appropriate documentation to prove the economic and financial capacities;
- Any further documents to prove the qualification required in the above Clauses on Selection and Award criteria;
- A signed declaration, by which the candidate(s) certifies not to be subject to one of the exclusion criteria as described in Clause "Eligibility criteria" and the veracity of the adjoining documents.

Please note that, to ensure equal treatment of all tenders, it is not possible to modify offers after their submission in relation to the technical and financial proposals. Therefore, incompleteness in this section can only result in negative impact for the evaluation of award criteria. Please note also that proposals deviating from the technical specifications may be rejected for non-conformity.

The selection of the candidate will be conducted by a selection panel composed of the chairman and the secretary of CEN/TC 264, the secretary of CEN/TC 264/WG 13 and a representative of DIN. Where a conflict of interest occurs a suitable deputy may be appointed.

Tenders should be sent by legal representative, i.e. to be considered, any possible association has to be formalized according to the local legislation before submitting the tender. Working teams, partnerships and other groups of people, particularly under the aegis of an institute qualify as contractors for the service contracts awarded in the course of this CfT (Call for Tender). Partnerships or joint ventures and other legally binding co-operations regardless of their organizational form qualify as well, provided they are recognized entities under the applicable national laws. Potential candidates may come from the public sector as well as from the private industry. It is essential however that the qualifications and experience of the individual fulfilling the tasks are properly described.

Regarding question concerning the information provided in this call for tender or in case of need for clarification or additional information please contact the secretary of CEN/TC 264/WG 13, Ms Elisabeth Hösen-Seul (e-mail: hoesen@vdi.de).

If due to queries or other reasons supplementary information to this call for tender is required, this will be published on the website of the VDI/DIN Commission on Air Pollution Prevention – Standards Committee (<http://www.krdl.de>).

Annex 2: Service contract for the standardization request

Service contract

Between

DIN Deutsches Institut für Normung e. V.
Am DIN-Platz, Burggrafenstr. 6
10787 BERLIN
GERMANY
hereinafter referred to as "DIN"

and

.....

hereinafter referred to as the "CONTRACTOR"

Introduction

The European Commission/EFTA has decided to fund Standardisation Request M/561 to the European Committee for Standardisation as regards methods for the measurement of volatile organic compounds that are ozone precursor substances in ambient air in support of Directive 2008/50/EC of the European Parliament and of the Council. This project is dealt with by CEN/TC 264 "Air Quality", the secretariat of which is held by DIN. DIN assures the organizational coordination work on behalf of CEN/TC 264.

1. Object of the Service contract

The CONTRACTOR agrees to produce the deliverable according to work package 7 for a cumulative amount of 50.000€ and over a time period of 18 months starting on the day of the signing of the contract.

2. Duties of the CONTRACTOR

The CONTRACTOR's duties will include the duties for WP 7 as described in III.1 "Tasks of work package 7"

The CONTRACTOR undertakes to perform its duties with reasonable care and skill applying recognized practices. The CONTRACTOR is not entitled to subcontract any rights and obligations of this Service contract without the prior written consent of DIN.

The selection procedure documented in Section VI and VII of the call for tender document selected the CONTRACTOR on the basis of its personal qualification and experience. All man days under this Service contract shall therefore be performed by the CONTRACTOR in person. Any deviations from this shall be justified in writing and authorized by the European Commission before any related funds can be disbursed.

In particular, the following target dates for each step shall be adhered to. In case of non-adherence to the target dates, the Commission/EFTA is entitled to cancel the funding.

All relevant reports for WP 7 shall be provided 18 months after the day of the signing of the contract at the latest.

The CONTRACTOR has to record the expenses for material and human resources (including exact date and hours). These records have to be kept for 10 years for possible inspection by DIN or a charged legal institution. Upon request, DIN or a charged legal institution shall have

unhindered access to the accounts and documents which may be required for auditing purposes.

3. Obligations of DIN

DIN will send the CONTRACTOR on its request the final report of the project the CONTRACTOR participated in.

4. Invoicing and Payment

In consideration of the work carried out according to this Service contract, the CONTRACTOR shall invoice to DIN Invoicing shall be done as follows:

- 50 % initial prefinancing
- 25 % % after submission of the contractually agreed interim report including all details necessary for drafting the requested European Standard.
- 25 % after submission of the contractually agreed final report. Payment will be done after reception of the EU funds by DIN as final payment.

The invoice shall state the following VAT numbers:

DIN: UST-ID-Nr: DE 136 622 143

DIN: UST-Nr: 27/640/50470

CONTRACTOR VAT identification number:

The aforesaid sum shall be understood to cover all expenditure incurred by the CONTRACTOR in the performance of this contract.

The payments are due only if the CONTRACTOR has fulfilled the tasks within the given time schedule, DIN has approved the results and the CONTRACTOR has sent a detailed invoice (material, cost for staff, travel etc.) that fulfils the requirements described below. All items shall be based on real costs as actually incurred. Estimated costs shall not be invoiced.

DIN has the right to demand invoices and documentation of work done before paying.

Payments will be made to the CONTRACTOR with the following Bank details:

[Name of the Bank]

[Full address of Bank]

€ (EUR) Account No ...

IBAN (International Bank Account Number): ...

BIC or SWIFT CODE (Business Identifier Code): ...

Each invoice shall comply with the requirements listed in the annexed document from EC, and be accompanied by a declaration of the work performed clearly stating the extent to which the tasks have been fulfilled.

The declaration:

- shall be signed;
- shall specify that 'working days' means 'full working days'
- shall specify the period within which the tasks were performed.

The total amount that the CONTRACTOR will in fact receive depends on whether the defined tasks of the CONTRACTOR have been completed (the number of days actually spent by the

CONTRACTOR in the context of this service contract, or the extent of tasks fulfilled if the number of man days was not specified).

Payment by DIN does not constitute acceptance of performance and is subject to the complete and due performance of the contract.

5. Provisions relating to fiscal charges

The CONTRACTOR will remain responsible for all taxes imposed on it and other related obligations that arise as a result of this Service contract.

6. Responsibility and Liability

DIN shall in no case, and under no circumstances, be held responsible for claims arising out of the present Service contract and relating to damages caused by the CONTRACTOR, its employees or a third party. No request of indemnity or re-instatement relating to such claims may be addressed to DIN.

The CONTRACTOR shall, in respect of the staff designated for the performance of this Service contract, observe all regulations of labour law, in particular the regulations of social security and fiscal law.

Notwithstanding anything to the contrary express or implied herein, the maximum liability of the CONTRACTOR under or otherwise in connection with this Service contract or its subject matter shall not exceed amount of 50.000€ in aggregate.

7. Confidentiality

The CONTRACTOR undertakes to maintain confidentiality as regards all actions necessary to fulfil the contracted duties. Both parties commit themselves to mutual loyalty.

8. Copyright

The CONTRACTOR undertakes to assign to DIN (or as DIN may direct) its patrimonial rights of exploitation and all and any intellectual property rights in the works developed by it under the scope of this Service contract.

Such assigned rights include reproduction rights including the publication, distribution, adjustment, translation, renting, loan, the remuneration rights for duplication and loan, as well as the rights of communication to the public of the works, in total or in part, in summary or with comments, and including the right to transfer all exploitation licences and to authorise all sub-licences.

The transfer of rights covers all languages and covers all forms of exploitation known at present and non-restrictively; publication by all means and via all graphical support systems, by print, press, photocopy, microfilms and via all magnetic, computerised and numerical support systems, memory cards, CD-ROMs, films, photographs, slides, teledistribution, cable, satellite, disks and online document servers.

For all and each of the assigned exploitation modes, the transfer is granted free of charge, for all countries and for the total duration of the intellectual property rights.

9. Termination

Regardless of other claims, in the case of serious disrespect of the terms of the Service contract by the CONTRACTOR (inter alia where the work is not provided in accordance with the terms of this Service contract, or not completed within the time limits according to this Service contract), DIN may cancel the contract at any time without notice.

Should the performance of the project as a whole be obstructed or jeopardized by circumstances beyond the control of the parties, DIN may cancel the Service contract giving six weeks' notice.

10. Withdrawal

DIN is entitled to withdraw from this Service contract if the European Commission/EFTA does not pay the funds to DIN or retroactively reclaims funds already paid to DIN under the Specific Grant Agreement, as any such payment is dependent on EC's acceptance of the interim and final reports defined in the Specific Grant Agreement.

11. Administrative provisions

With the exception of invoices, all correspondence with DIN concerning the performance of this Service contract shall be addressed as follows:

VDI Verein Deutscher Ingenieure e.V.
VDI/DIN-Kommission Reinhaltung der Luft (KRdL) – Normenausschuss
Dr. Elisabeth Hösen-Seul, Secretary CEN/TC 264/WG 13
P.O. box 10 11 39
40002 DÜSSELDORF
GERMANY
E-mail: hoesen@vdi.de (valid until 2023-12-31, afterwards: krdl@vdi.de)

All invoices to DIN shall be addressed as follows:

DIN Deutsches Institut für Normung e. V.
DIN/FCO
Am DIN-Platz
Burggrafenstraße 6
10787 Berlin

All invoices have to be sent via email to DIN to the following email address:
oeffentlichehand@din.de

All correspondence with the CONTRACTOR shall be addressed as follows:

<<Mr/Ms NN Phone: , email>>

12. Assignment

The CONTRACTOR shall not assign, transfer, subcontract or in any other manner make over to any third party the benefit and/or burden of this Service contract without the prior written consent of DIN.

13. Alterations to the Service contract

Subsidiary agreements and modifications to this Service contract are only legally binding when in written form and signed by both parties. This applies also to any agreement by which such written form requirement is to be contracted out.

14. Validity

If any of the provisions of this Service contract shall become or be held invalid or unenforceable, this shall not affect any part of the remaining contract.

15. Place of jurisdiction

Place of jurisdiction for all disputes arising out of or in connection with this Service contract shall be Berlin.

16. Applicable Law

This Service contract shall be governed by and interpreted in accordance with German Law.

Annex A
EC Mandatory Content of an Invoice

Annex A: EC Mandatory Content of an Invoice

Content of an invoice – 2016-03-14 – EC DG GROW

Supplier information

Compulsory information for an invoice for all or majority of member states	Compulsory information for an invoice for certain member states only
Full name of the supplier	
Full address of the supplier	
The VAT identification number of the supplier in accordance with ISO Standard under which he supplied the goods and services (for all member states except Bulgaria)	For Bulgaria, Cyprus, Germany, Greece, Romania, Slovakia: Tax reference number of the supplier, in other cases, where your country refrains from allocating a VAT identification number in accordance with ISO Standard for certain cases
	For Belgium, Cyprus, Denmark, Estonia, France, Germany, Greece, Hungary, Italy, Latvia, Lithuania, Netherlands, Poland Portugal, Romania, Slovenia: • Full name of tax representative (if any) of the supplier where the person liable to pay VAT is the tax representative, • Full address of the tax representative (if any) of the supplier where the person liable to pay VAT is the tax representative, • VAT identification number of the fiscal representative in accordance with ISO Standard (if any) of the supplier where the person liable to pay the VAT is the tax representative.

Customer information

Compulsory information for an invoice for all or majority of member states	Compulsory information for an invoice for certain member states only
Full name of the customer	
Full address of the customer	
The VAT identification number of the customer in accordance with ISO Standard where the customer is liable to pay the VAT or in case of intra-Community supplies (except for Bulgaria)	For Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Germany, Greece, Latvia, Lithuania, Malta, Poland, Portugal, Romania, Slovak Republic, Spain: The VAT identification number of the customer in other cases than general rule.
	For Belgium, Cyprus, Estonia, Greece, Hungary, Italy, Latvia, Lithuania, Netherlands, Poland, Portugal, Romania, Slovenia: • Full name of the tax representative (if any) of the customer where the person liable to pay VAT is the tax representative • Full address of the tax representative (if any) of the customer where the person liable to pay VAT is the tax representative • VAT identification number of the fiscal representative (if any) the customer where the person liable to pay the VAT is the tax representative

 Content information
