Press release: European standards support the EU Industrial Strategy

European standards play a key role in contributing to a strong, sustainable, resilient, and innovative European economy. For this reason, CEN and CENELEC warmly welcome the ambitions of the Industrial Strategy for Europe and are ready to support the European Commission in a successful relaunch of this strategy for the future of European industry.

European Standards for Artificial Intelligence

On 21 April, the European Commission issued its new, long-awaited Regulation on Artificial Intelligence (AI). To help address the questions it poses and provide support to the deployment of AI in Europe, European standards play a key role. To organise and develop standardization work on this issue, CEN and CENELEC have established the CEN-CENELEC Joint Technical Committee 21 'Artificial Intelligence'.

How to decide when choosing gaseous fire extinguishing systems

Gaseous fire extinguishing systems are a very effective way to protect critical hazards and high value assets. An additional factor is personal safety, as many of the protected facilities are occupied, either permanently or occasionally. **Euralarm** recently published a guidance document to make any person involved in the choice of a system aware of the major differences between quality marks and to help them make a decision based on clear

and balanced information.
